

WORKPLACE SAFETY MANUAL

VisionDesk AI – Sample Document for Document Intelligence Training

1. Purpose

This safety manual provides basic workplace safety requirements for employees, visitors, and contractors working in operational areas.

2. Personal Protective Equipment (PPE)

PPE	Requirement
Safety Helmet	Mandatory in production and construction areas.
Safety Vest	Required in designated operational areas.
Safety Shoes	Required where there is a risk of foot injury.
Safety Gloves	Required when handling materials that may cause hand injury.
Safety Goggles	Required when there is a risk of dust, particles, or chemical splashes.

3. Workplace Safety Rules

- Keep walkways, emergency exits, and access routes clear at all times.
- Report unsafe conditions, damaged equipment, and hazards to the supervisor.
- Do not operate machinery without appropriate training and authorization.
- Follow warning signs, safety instructions, and designated restricted-area requirements.
- Use equipment only for its intended purpose and follow operating procedures.

4. Incident Reporting

All workplace incidents, near misses, and observed safety violations should be reported promptly to the responsible supervisor or safety officer. The report should include the date, location, incident description, and immediate action taken.

5. Emergency Procedures

- Remain calm and follow the site's emergency instructions.
- Move to the designated assembly point when evacuation is required.
- Do not block emergency exits or access routes.
- Inform the responsible emergency coordinator about hazards or injured persons.

6. Safety Inspection Checklist

Inspection Item	Status
Required PPE available	Check
Workers wearing required PPE	Check
Emergency exits unobstructed	Check
Safety signs visible	Check
Equipment condition verified	Check

Hazards reported	Check
